

A Brand Nuwe Thinking

# Brand Nuwe by Just Nevaeh

# HAVING A CLEAR VISION, WE PUT YOUR BRAND FRONT AND CENTER.

With creative and customised photography and video strategies, your brand will surely get noticed.

# About

# Brand Nuwe

Brand Nuwe was created during the pandemic from a business that was doing the same thing (photography, video and graphic creation) but on a personal level capturing the special moments that tell the stories of every individual's life moments.

We decided to take all we had learnt and mastered and create a dedicated space just for businesses and entrepreneurs to create visuals that represent the brand in a holistic way.

We are an example of a brand that decided in one of the hardest times of our business we would show up and be seen.

Our **Motto**: If they can't see you, they can't buy you.

# OUR SERVICE

## Photography

Photography is not only a creative way to showcase your brand but it's your first impression and visual representation without saying a word. We offer a few options that can help you to show up and be seen.

## Creative Content Video

A content creator produces entertaining or educational material that caters to the interests and challenges of your target audience. The content we look to produce come in many forms, including vlog posts, videos, commercials, and infographics to be used across all your touch points. Today, especially online it is vital that you are showing up and been seen in your field as progressive, engaging and creative.

# Photography & Video

---

## Head Shots -

Headshots is a digital portrait in which we focus on the persons image from the shoulders up to the facial features. The images are usually for professional profile used on social media, online profiles, the 'about us page' or a corporate website and promotional pictures that represent your brand. Add a video message to give your audience a personal touch to your brand.

## Personal Brand Shoots

A brand photoshoot is a photoshoot that's centred around your brand persona, this could be your personal image, your business image or both. The photoshoot is a pre-planned photoshoot where we're determining the purpose of all images for where each image is used. These images should be considered for all online and offline values. We're asking how to bring the brand to life, and how you want people/ your audience to feel and perceive your brand based on those images. Use video to tell your audience more about how you started the brand and give a deeper dive into how they can expect to feel when using the brand service.

# Head Shoots
